

A **Hackathon** is a time-bound competition or event where students or professionals work in teams to develop innovative solutions, prototypes, or software for real-world problems

National Level Project Competitions (Hackathon)

One team successfully qualified for the Grand Finale of Smart India Hackathon 2025 (SIH 2025), showcasing innovation, technical skills, and problem-solving abilities at the national level.

A total of 35 teams were shortlisted after a rigorous evaluation conducted by External and Internal Jury Members along with the Evaluation Teams, based on innovation, feasibility, technical readiness, and presentation quality. The active participation of 276 students reflected the strong innovation culture, creativity, and problem-solving spirit among students across the campus

The Smart India Hackathon (SIH) is a nationwide innovation competition organized by the Ministry of Education and AICTE, where students develop solutions for real-world problems given by government departments, industries, and NGOs. It started in 2017 and is considered one of the world's largest hackathons.

The received an overwhelming response with participation from 46 teams across various departments. After evaluation by the Internal College Committee (ICC), 35 teams were shortlisted based on innovation, technical feasibility, and presentation quality. A total of 276 students participated in the event, reflecting strong student involvement and promoting a vibrant culture of innovation, creativity, and research within the institution.

An internal college level hackathon is a competition organized within a college where students form teams to develop innovative ideas, prototypes, or solutions for given problem statements within a fixed time.
